p. 3	M&A Activity trend
p. 4	Top Deals
p.5	Breakdown of announced deals
p. 6-13	League tables
p. 12	Criteria
p. 13	About mergermarket

### **European M&A down 55%**

The 3,537 transactions, valued at US\$473.9bn, announced in 2009 represent a decrease of 55% by value and 35% by volume from 2008, in which 5,456 deals with a total value of US\$1,048bn were announced.

European M&A activity made up 27% of global activity by value and 37% by volume of deals announced in 2009, compared to 43% for 2008.

### **Financial Services and Energy, Mining & Utilities sectors continue to dominate; Iberia on the rise as UK & Ireland still on top**

Half of the total value of European M&A in 2009 – including six of the ten largest European deals of the year – took place in the Financial Services and Energy, Mining & Utilities sectors, up from 49% for 2008.

The UK & Ireland remained the largest M&A markets in Europe, contributing 27% to the total value of European M&A. Iberia meanwhile experienced the largest increase as it contributed 13% to Europe's total value, up from 8% in 2008.

### **Freshfields overtakes Linklaters to top both value and volume league tables**

2009's winner in Europe was Freshfields which, with 170 deals valued at US\$282.3bn, knocked Linklaters off its top spot in the European tables the previous year by both value and volume. In both cases Linklaters came second, with Freshfields only picking up four more deals than Linklaters in 2009, but taking first place in the value tables by a clear margin. The European Magic Circle firms shared the top of the value table between them, with the absence only of Allen & Overy, which retreated down the European value tables in 2009 to 15th place (and disappeared out of the global top 20 by value altogether), though it continued to put in a good showing by volume, coming in third with 151 deals worth US\$48,8bn. Sullivan & Cromwell was once again the top-ranking US firm in Europe, coming fifth with 39 deals valued at US\$96,7bn.

### **Europe 2009: Surprising early return for buyout activities**

The European buyout financing recovery may have come earlier than expected. Q2 2009 saw a 70% increase in European buyout deals in value terms over the previous quarter, after the 73% and 48% quarterly drops in Q4 2008 and Q1 2009 respectively. The growth gained momentum as Q3 and Q4 2009 reported 33% and 108% quarterly increases respectively. Q4 2009 was particularly strong, posting a massive 356% increase in total value of mega buyouts (>US\$500m) over the previous quarter.

### **Outlook for 2010**

There seems to be a move away from mergers of necessity towards mergers of growth, as the Cadbury/Kraft Foods deal signals. There is also an increase in mega deals, which the VW/Porsche transaction underlines. As the uncertainty over Eurozone states' sovereign debt levels increases, the euro may depreciate, in particular against the US dollar as investors seek security. This could lead to increased inbound transatlantic activity as European companies become relatively cheap.

Deals where the stake acquired is less than 30% will only be included if their value is greater than US\$100m. Activities excluded from the league tables include property transactions and restructurings where the ultimate shareholders' interests are not changed. League tables are based on the dominant geography of the target, bidder or seller.

The trend graphs and pie charts are based on the dominant industry and/or dominant geography of the target and include announced transactions over US\$5m in the given time period.
